					al					al		
Pre-requisites												
Nil												
Scope and Objectives:												
	<p>To critically appraise the literature with help of printed journal and online sources. To choose a journal article that is relevant in answering the research problem. To evaluate the hypothesis, the study design, the method and the results in a systematic fashion. To understand how results of previous study can be used in framing research proposal.</p>											
Learning Outcome:												
	<p>At the end of the course, the students will be able for data mining and come to a right point to design hypothesis.</p>

Pre-requisites

Nil

Scope and Objectives:

The aim of this course is to enable students
To develop an understanding and obtain practical experience of the research process and research skills required to undertake a supervised research project.
To address issues of research design, methodology, ethics and theoretical arguments, and apply these to their own research.
To execute experiment from proposal and arrive at constructive outcome.

Learning Outcome:

Students will become able to implement hypothesis in laboratory. They gather information and analyzed them scientifically and logically to meet answer.

By the end of the course students will be able to;

- design a research proposal and protocol
- synthesise knowledge and skills previously gained and applied to an in-depth study
- establish links between theory and methods within their field of study
- select from different methodologies, methods and forms of analysis to produce a suitable research design, and justify their design

present the findings of their project in a written report.
