GANPAT UNIVERSITY													
FACULTY OF PHARMACY													
Program	Bachelor of Pharmacy				Branch/Spec.	B.Pharm.							
Semester	II				Version	3.0.0.0							
Effective from Academic Year	2018-19			Effective for the batches Admitted onwards	2018-19								
Subject code	BPH201			Subject Name	Human Anatomy and Physiology - II								
Teaching scheme					Examination scheme								
	Le	Tu	Pr	Total	Marks	CE	SE	ES	Total	Duration	SE	ES	
Hours	3	1	4	8	Theory	10	15	75	100	Theory	1 hr.	3 hr.	
Credit	3	1	2	6	Practical	10	15	75	100	Practical	4 hr.	4 hr.	
Pre-requisites													
Nil													
Scope and Objectives:													
Upon completion of the course student shall be able to													
	<ul style="list-style-type: none"> Explain the gross morphology, structure and functions of various organs of the human body. Describe the various homeostatic mechanisms and their imbalances. Identify the various tissues and organs of different systems of human body. Perform the hematological tests like blood cell counts, haemoglobin estimation, bleeding/clotting time etc. and also record blood pressure, heart rate, pulse and respiratory volume. Appreciate coordinated working pattern of different organs of each system Appreciate the interlinked mechanisms in the maintenance of normal functioning (homeostasis) of human body. 												
Learning Outcome:													
	Know the gross morphology, structure and functions of various organs of the human body.												
	Describe the various homeostatic mechanisms and their imbalances.												
	Identify the various tissues and organs of different systems of human body.												
	Perform the various experiments related to special senses and nervous system.												
	Evaluate the coordinated working pattern of different organs of each system.												
	Appreciate the interlinked mechanisms in the maintenance of normal functioning (homeostasis) of human body.												
Syllabus- Theory													
Unit	Content											Hrs	
1	Nervous system: Organization of nervous system, neuron, neuroglia, classification and properties of nerve fibre, electrophysiology, action potential, nerve impulse, receptors, synapse, neurotransmitters Central nervous system: Meninges, ventricles of brain and cerebrospinal fluid. structure and functions of brain (cerebrum, brain stem, cerebellum), spinal cord (gross structure, functions of afferent and efferent nerve tracts, reflex activity)											10	
2	Digestive System: Anatomy of GI Tract with special reference to anatomy and functions of stomach, (Acid production in the stomach, regulation of acid production through parasympathetic nervous system, pepsin role in protein digestion) small intestine and large intestine, anatomy and functions of salivary glands, pancreas and liver, movements of GIT, digestion and absorption of nutrients and disorders of GIT. Energetics: Formation and role of ATP, Creatinine Phosphate and BMR.											6	
3	Respiratory system Anatomy of respiratory system with special reference to anatomy of lungs, mechanism of respiration, regulation of respiration Lung Volumes and capacities transport of respiratory gases, artificial respiration, and resuscitation methods Urinary system Anatomy of urinary tract with special reference to anatomy of kidney and nephrons, functions of kidney and urinary tract, physiology of urine formation, micturition reflex and role of kidneys in acid base balance, role of RAS in kidney and disorders of kidney											10	
4	Endocrine system Classification of hormones, mechanism of hormone action, structure and functions of pituitary gland, thyroid gland, parathyroid gland, adrenal gland, pancreas, pineal gland, thymus and their disorders											10	

5	<p>Reproductive system Anatomy of male and female reproductive system, Functions of male and female reproductive system, sex hormones, physiology of menstruation, fertilization, spermatogenesis, oogenesis, pregnancy and parturition.</p> <p>Introduction to genetics Chromosomes, genes and DNA, protein synthesis, genetic pattern of inheritance</p>	9
Syllabus-Practical		
1	To study the integumentary and special senses using specimen, models, etc.,	
2	To study the nervous system using specimen, models, etc.,	
3	To study the endocrine system using specimen, models, etc	
4	To demonstrate the general neurological examination	
5	To demonstrate the function of olfactory nerve	
6	To examine the different types of taste.	
7	To demonstrate the visual acuity	
8	To demonstrate the reflex activity	
9	Recording of body temperature	
10	To demonstrate positive and negative feedback mechanism	
11	Determination of tidal volume and vital capacity	
12	Study of digestive, respiratory, cardiovascular systems, urinary and reproductive systems with the help of models, charts and specimens	
13	Recording of basal mass index	
14	Study of family planning devices and pregnancy diagnosis test	
15	Demonstration of total blood count by cell analyser	
16	Permanent slides of vital organs and gonads	
Text books		
1	Essentials of Medical Physiology by K. Sembulingam and P. Sembulingam. Jaypee brothers medical publishers, New Delhi	
2	Anatomy and Physiology in Health and Illness by Kathleen J.W. Wilson, Churchill Livingstone, New York	
3	Physiological basis of Medical Practice-Best and Taylor. Williams & Wilkins Co, Riverview, MI USA	
4	Text book of Medical Physiology- Arthur C, Guyton and John. E. Hall. Miamisburg, OH, U.S.A	
5	Principles of Anatomy and Physiology by Tortora Grabowski. Palmetto, GA, U.S.A	
6	Textbook of Human Histology by Inderbir Singh, Jaypee brothers medical publishers, New Delhi	
7	Textbook of Practical Physiology by C.L. Ghai, Jaypee brothers medical publishers, New Delhi	
8	Practical workbook of Human Physiology by K. Srinageswari and Rajeev Sharma, Jaypee brother's medical publishers, New Delhi	
Reference books		
1	Physiological basis of Medical Practice-Best and Taylor. Williams & Wilkins Co, Riverview, MI USA	
2	Text book of Medical Physiology- Arthur C, Guyton and John. E. Hall. Miamisburg, OH, U.S.A	
3	Human Physiology (vol 1 and 2) by Dr. C.C. Chatterrje ,Academic Publishers Kolkata	

GANPAT UNIVERSITY

FACULTY OF PHARMACY

Program	Bachelor of Pharmacy	Branch/Spec.	B.Pharm.									
Semester	II	Version	3.0.0.0									
Effective from Academic Year	2018-19	Effective for the batches Admitted onwards	June 2018									
Subject code	BPH202	Subject Name	Pharmaceutical Organic Chemistry I									
Teaching scheme				Examination scheme								
	Le	Tu	Pr	Total	Marks	CE	SE	ES	Total	Duration	SE	ES
Hours	3	1	4	8	Theory	10	15	75	100	Theory	1 hr.	3 hr.
Credit	3	1	2	6	Practical	10	15	75	100	Practical	4 hr.	4 hr.
Pre-requisites												
Nil												
Scope and Objectives:												
This course deals with the fundamentals of Organic chemistry.												
Learning Outcome:												
Know fundamental principles of Organic Chemistry.												
Understand the chemical and molecular processes which takes place in organic chemical reactions.												
Application of novel approaches in synthetic chemistry												
Qualitative analysis of various functional groups.												
Evaluate the Physical and chemical Properties of given compounds.												
Create excellent skills in construction of molecular modelling												
Syllabus- Theory												
Unit	Content											Hrs
1	Classification, nomenclature and isomerism: Classification of Organic Compounds Common and IUPAC systems of nomenclature of organic compounds (up to 10 Carbons open chain and carbocyclic compounds) Structural isomerisms in organic compounds											7
2	Alkanes and Alkenes SP hybridization in alkanes, Halogenation of alkanes, uses of paraffins, Stabilities of alkenes, SP hybridization in alkenes, E1 and E2 reactions – kinetics, order of reactivity of alkyl halides, rearrangement of carbocations, Saytzeffs orientation and evidences. E1 verses E2 reactions, Factors affecting E1 and E2 reactions. Ozonolysis, electrophilic addition reactions of alkenes, Markownikoff's orientation, free radical addition reactions of alkenes, Anti Markownikoff's orientation.											7
3	Conjugated dienes: Stability of conjugated dienes, Diel-Alder, electrophilic addition, free radical addition reactions of conjugated dienes, allylic rearrangement											3
4	Alkyl halides: SN1 and SN2 reactions - kinetics, order of reactivity of alkyl halides, stereochemistry and rearrangement of carbocations SN1 versus SN2 reactions, Factors affecting SN1 and SN2 reactions Structure and uses of ethylchloride, Chloroform, trichloroethylene, tetrachloroethylene, dichloromethane, tetrachloromethane and iodoform											6
5	Alcohols- Qualitative tests, Structure & uses of Ethyl alcohol, Methyl alcohol, chlorobutanol, Cetosteryl alcohol, Benzyl alcohol, Glycerol, Propylene glycol											4
6	Carbonyl compounds (Aldehydes and ketones): Nucleophilic addition, Electromeric effect, aldol condensation, Crossed Aldol condensation, Cannizzaro reaction, Crossed Cannizzaro reaction, Benzoin condensation, Perkin condensation, qualitative tests, Structure and uses of Formaldehyde, Paraldehyde, Acetone, Chloral hydrate, Hexamine, Benzaldehyde, Vanilin, Cinnamaldehyde											9

7	Carboxylic acids: Acidity of carboxylic acids, effect of substituents on acidity, inductive effect and qualitative tests for carboxylic acids ,amide and ester Structure and Uses of Acetic acid, Lactic acid, Tartaric acid, Citric acid, Succinic acid. Oxalic acid, Salicylic acid, Benzoic acid, Benzyl benzoate, Dimethyl phthalate, Methyl salicylate and Acetyl salicylic acid	6
8	Aliphatic amines - Basicity, effect of substituent on Basicity. Qualitative test, Structure and uses of Ethanolamine, Ethylenediamine, Amphetamine	3

Syllabus-Practical

1	Systematic qualitative analysis of organic compounds and preparation of their derivative such as Benzoic acid, acetanilide, alpha naphthol, paratoludene, naphthalene, anthracene, resourcinoletc
2	Synthesis of important medicinal agents based on reaction mechanism such as nitration, sulfonation, halogenation, esterification etc.
3	Following compounds shall be synthesized. Acetanilide, P-nitro acetanilide, Phthalimideetc
4	Construction of molecular models

Text books

1	Organic Chemistry, Robert T. Morrison and Robert N. Boyd, 6th ed., PH I Learning Pvt. Ltd., New Delhi, 2008
2	Introduction to Organic Chemistry I &II by HetalPrajapati, Nirav&Roopalprakashan
3	Organic Chemistry, Vol I and II by I. L. Finar, 6th ed., Pearson Education, New Delhi, 2000
4	Practical Organic Chemistry by Hitesh Raval and Sunil Baldania, Nirav&Roopalprakashan
5	Vogel's text book of Practical Organic Chemistry
6	Practical Pharmaceutical Organic Chemistry-1 by ArvindUmarkar.
7	Advanced Practical organic chemistry by N.K.Vishnoi.

Reference books

1	Advanced Organic Chemistry, Jerry March, 4th ed., Wiley India, 2007
2	Organic Chemistry, G. Marc Loudon, 4th ed., Oxford University Press, 2004.
3	Textbook of Organic Chemistry by B.S. Bahl& ArunBahl.
4	Introduction to Organic Laboratory techniques by Pavia, Lampman and Kriz.

Pre-requisites												
Nil												
Scope and Objectives:												
This course is designed to impart a fundamental knowledge on the art and science of various unit operations used in pharmaceutical industry.												
Learning Outcome:												
Know various unit operations utilised in the pharmaceutical industry and learn the technique of handling materials.												
Understand the principles, working and applications of various processes which are used in pharmaceutical industries.												
Apply knowledge of working principles of theories in selection of best processes in manufacturing of pharmaceuticals.												
Analyse the factors influencing different processes in pharmaceutical manufacturing.												
Solve different problems to develop better controlled processes.												
Perform various operations related to processes used in manufacturing of pharmaceuticals.												
Syllabus- Theory												
Unit	Content										Hrs	
1	Flow of fluids: Types of manometers, Reynolds number and its significance, Bernoulli's theorem and its applications, Energy losses, Orifice meter, Venturimeter, Pitot tube and Rotometer.										5	
2	Size Reduction: Objectives, Mechanisms & Laws governing size reduction, factors affecting size reduction, principles, construction, working, uses, merits and demerits of Hammer mill, ball mill, fluid energy mill, Edge runner mill & end runner mill.										3	
3	Size Separation: Objectives, applications & mechanism of size separation, official standards of powders, sieves, size separation. Principles, construction, working, uses, merits and demerits of Sieve shaker, cyclone separator, Air separator, Bag filter & elutriation tank.										2	
4	Heat Transfer: Objectives, applications & Heat transfer mechanisms. Fourier's law, Heat transfer by conduction, convection & radiation. Heat interchangers & heat exchangers.										2	
5	Evaporation: Objectives, applications and factors influencing evaporation, differences between evaporation and other heat process. principles, construction, working, uses, merits and demerits of Steam jacketed kettle, horizontal tube evaporator, climbing film evaporator, forced circulation evaporator, multiple effect evaporator & Economy of multiple effect evaporator.										4	
6	Distillation: Basic Principles and methodology of simple distillation, flash distillation, fractional distillation, distillation under reduced pressure, steam distillation & molecular distillation										4	
7	Drying: Objectives, applications & mechanism of drying process, measurements & applications of Equilibrium Moisture content, rate of drying curve. principles, construction, working, uses, merits and demerits of Tray dryer, drum dryer spray dryer, fluidized bed dryer, vacuum dryer, freeze dryer										5	

8	Mixing: Objectives, applications & factors affecting mixing, Difference between solid and liquid mixing, mechanism of solid mixing, liquids mixing and semisolids mixing. Principles, Construction, Working, uses, Merits and Demerits of Double cone blender, twin shell blender, ribbon blender, Sigma blade mixer, planetary mixers, Propellers, Turbines, Paddles & Silverson Emulsifier	5
9	Filtration: Objectives, applications, Theories & Factors influencing filtration, filter aids, filter medias. Principle, Construction, Working, Uses, Merits and demerits of plate & frame filter, filter leaf, rotary drum filter, Meta filter & Cartridge filter, membrane filters and Seidtz filter	5
10	Centrifugation: Objectives, principle & applications of Centrifugation, principles, construction, working, uses, merits and demerits of Perforated basket centrifuge, Non-perforated basket centrifuge, semi continuous centrifuge & super centrifuge.	5
11	Materials of pharmaceutical plant construction, Corrosion and its prevention: Factors affecting during materials selected for Pharmaceutical plant construction, Theories of corrosion, types of corrosion and there prevention. Ferrous and nonferrous metals, inorganic and organic non metals, basic of material handling systems.	5
Syllabus-Practical		
1	Determination of radiation constant of brass, iron, unpainted and painted glass	
2	Steam distillation – To calculate the efficiency of steam distillation.	
3	To determine the overall heat transfer coefficient by heat exchanger	
4	Construction of drying curves (for calcium carbonate and starch).	
5	Determination of moisture content and loss on drying.	
6	Determination of humidity of air – i) From wet and dry bulb temperatures – use of Dew point method	
7	Description of Construction working and application of Pharmaceutical Machinery such as rotary tablet machine, fluidized bed coater, fluid energy mill, de humidifier	
8	Size analysis by sieving – To evaluate size distribution of tablet granulations – Construction of various size frequency curves including arithmetic and logarithmic probability plots	
9	Size reduction: To verify the laws of size reduction using ball mill and determining Kicks, Rittinger's, Bond's coefficients, power requirement and critical speed of Ball Mill	
10	Demonstration of colloid mill, planetary mixer, fluidized bed dryer, freeze dryer and such other major equipment	
11	Factors affecting Rate of Filtration and Evaporation (Surface area, Concentration and Thickness/ viscosity	
12	To study the effect of time on the Rate of Crystallization.	
13	To calculate the uniformity Index for given sample by using Double Cone Blender	
Text books		
1	Physical pharmaceuticals- C.V.S Subrahmanyam et al., Vallabh Prakashan Latest edition.	
2	Pharmaceutical Engineering-I and II - G.K.Jani, B. S. Shah Prakashan	
3	Pharmaceutical Engineering, Thakur Publication	
4	Pharmaceutical Engineering, K. Sambamurty, New Age Publication	
Reference books		
1	Introduction to chemical engineering – Walter L Badger & Julius Banchemo, Latest edition.	
2	Solid phase extraction, Principles, techniques and applications by Nigel J.K. Simpson-Latest edition.	
3	Unit operation of chemical engineering – McCabe Smith, Latest edition.	
4	Pharmaceutical engineering principles and practices – C.V.S Subrahmanyam et al., Latest edition.	
5	Remington practice of pharmacy- Martin, Latest edition.	
6	Theory and practice of industrial pharmacy by Lachmann., Latest edition.	
7	Cooper and Gunn's Tutorial pharmacy, S.J. Carter, Latest edition

Pre-requisites												
Nil												
Scope and Objectives:												
This subject deals with the introduction Database, Database Management system, computer application in clinical studies and use of databases.												
Learning Outcome:												
Know the number systems, conversion, calculations and the concept of the information systems and software in pharmacy												
Understand various types of applications of software used in pharmacy												
Understand the various web technologies and the different databases and various applications of databases in pharmacy .												
Apply the knowledge of Bioinformatics Databases, and data analysis in Preclinical development like CDS, LIMS and TIMS												
Design questionnaires, invoice tables, drug information storage and its retrieval and its side effects. using word process												
Create a personal HTML webpage, invoice tables, Generate reports and Exporting Tables, Queries, Forms and Reports.												
Syllabus- Theory												
Unit	Content											Hrs
1	Number system: Binary number system, Decimal number system, Octal number system, Hexadecimal number systems, conversion decimal to binary, binary to decimal, octal to binary etc, binary addition, binary subtraction – One's complement ,Two's complement method, binary multiplication, binary division Concept of Information Systems and Software : Information gathering, requirement and feasibility analysis, data flow diagrams, process specifications, input/output design, process life cycle, planning and managing the project											9
2	Web technologies: Introduction to HTML, XML,CSS and Programming languages, introduction to web servers and Server Products. Introduction to databases, MYSQL, MS ACCESS, Pharmacy Drug database											9
3	Application of computers in Pharmacy – Drug information storage and retrieval, Pharmacokinetics, Mathematical model in Drug design, Hospital and Clinical Pharmacy, Electronic Prescribing and discharge (EP) systems, barcode medicine identification and automated dispensing of drugs, mobile technology and adherence monitoring Diagnostic System, Lab-diagnostic System, Patient Monitoring System, Pharma Information System											9
4	Bioinformatics: Introduction, Objective of Bioinformatics, Bioinformatics Databases, Concept of Bioinformatics, Impact of Bioinformatics in Vaccine Discovery											9
5	Computers as data analysis in Preclinical development: Chromatographic data analysis(CDS), Laboratory Information management System (LIMS) and Text Information Management System(TIMs)											9
Syllabus-Practical												
1	Design a questionnaire using a word processing package to gather information about a particular disease.											
2	Create a HTML web page to show personal information.											
3	Retrieve the information of a drug and its adverse effects using online tools											
4	Creating mailing labels Using Label Wizard , generating label in MS WORD											
5	Create a database in MS Access to store the patient information with the required fields Using access											
6	Design a form in MS Access to view, add, delete and modify the patient record in the database											
7	Generating report and printing the report from patient database											

8	Creating invoice table using – MS Access
9	Drug information storage and retrieval using MS Access
10	Creating and working with queries in MS Access
11	Exporting Tables, Queries, Forms and Reports to web pages
12	Exporting Tables, Queries, Forms and Reports to XML pages

Scope and Objectives:													
Upon completion of the course student shall be able to													
	<ul style="list-style-type: none"> • Create the awareness about environmental problems among learners. • Impart basic knowledge about the environment and its allied problems. • Develop an attitude of concern for the environment. • Motivate learner to participate in environment protection and environment improvement. • Acquire skills to help the concerned individuals in identifying and solving environmental problems. • Strive to attain harmony with Nature. 												
Learning Outcome:													
	Impart basic knowledge about the environment and its allied problems												
	Understand the various types of environmental problems												
	Identify and apply knowledge for solving environmental problems.												
	Develop an attitude of concern for the environment.												
	Participative in environment protection and environment improvement												
Syllabus- Theory													
Unit	Content											Hrs	
1	The Multidisciplinary nature of environmental studies Natural Resources Renewable and non-renewable resources: Natural resources and associated problems a) Forest resources; b) Water resources; c) Mineral resources; d) Food resources; e) Energy resources; f) Land resources: Role of an individual in conservation of natural resources											15	
2	Ecosystems: Concept of an ecosystem. Structure and function of an ecosystem. Introduction, types, characteristic features, structure and function of the ecosystems: Forest ecosystem; Grassland ecosystem; Desert ecosystem; Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)											15	
3	Environmental Pollution: Air pollution; Water pollution; Soil pollution											15
